DO IT RIGHT!

# Wiping cloths

## Sanitation

The wiping cloths you use to clean dirty surfaces will eventually become soiled and contaminated.

If they are not cleaned properly or replaced, they may become a breeding ground for germs that may spread to other areas of your facility.

DO IT RIGHT!

# Wiping cloths

## Sanitation

- Store the cloths in a sanitizer solution and launder them daily.
- Alternatively, use single-use cloths or wipes to clean and sanitize surfaces.
- Check concentration of the sanitizer solution in the pails.
